Purpose: For students to learn about the geographic regions of Canada. In small groups they will research the location, types of landforms and waterways, temperature range, seasons, natural resources, plants and animals in the area. Finally, students will learn about the Aboriginal People of Canada found throughout these geographic regions.

Estimated time: Two 60-minute periods

Resources required:
- Resources for research (e.g.: books, encyclopedias, internet, etc.)

Resources included:
- Blackline master 1 and 2

Activity:
1. Ask students to define the term “geographic region”. Write students’ answers on the board.

2. Explain that a geographic region is an area on the earth that has similar and distinct characteristics. These characteristics are different from the regions around it.

3. Explain to students that Canada has distinct geographic regions:
   - The Pacific Coast
   - The Cordillera or Plateau
   - The Prairies
   - The Canadian Shield
   - The St. Lawrence and Great Lakes Lowlands
   - The Atlantic Provinces or Eastern Woodlands
   - The Sub-Arctic
   - The Arctic North

4. Divide the class into eight groups and assign each group one of the eight geographic regions.

5. Distribute blackline master 1 and 2 to each group.

6. In their groups ask students to research the following characteristics about their region, filling in Chart 1 on blackline master 1 and colouring the region into the map on blackline master 2:
   - Location in Canada
   - Landforms
   - Waterways
   - Range of temperatures
   - Seasons
   - Natural resources
   - Plants
   - Animals

7. Encourage students to use resources around the classroom (e.g.: books, encyclopedias, internet, etc.) to research their geographic regions.

8. Once students have completed Chart 1 on blackline master 1 and coloured their region on blackline master 2, bring the class back together. Encourage each group to say a few words about their assigned region.

9. Following this discussion, explain to students that Aboriginal People of Canada of common cultures existed in these geographic regions at the time of first contact with Europeans.

10. In their groups they will be assigned to First Nations and Inuit People who resided in their region. Students must research these People and fill out Chart 2 on blackline master 1, identifying traditional food, shelter, transportation and clothing.

11. At the conclusion of this research, groups must analyze how the characteristics of the geographic region influenced the traditional lifestyles of First Nations and Inuit People in the area.

12. Provide students with the following suggested topics:
   - The Pacific Coast: The Haida
   - The Cordillera or Plateau: The Kootenay
   - The Prairies: The Blackfoot
   - The Canadian Shield: The Cree
   - The St. Lawrence and Great Lakes Lowlands: The Huron
   - The Atlantic Provinces: The Mi’kmaq
   - The Sub-Arctic: The Dene
   - The Arctic North: The Iglulik Inuit

13. Encourage students to search for additional First Nations and Inuit People from their geographic region.

14. When students have completed Chart 2 on blackline master 1, ask groups to create a small one-minute presentation on their topics to inform the rest of the class.

15. Bring the class back together and allow presentations to begin.
16. At the conclusion of the presentations, encourage active discussion among the students by asking the following suggested questions:
   - What are the similarities and differences between the regions in Canada?
   - How did the environment influence the way of life of the First Nations and Inuit People in the area?

17. Before concluding this activity, ensure students have a firm understanding of the regions in Canada and the First Nations and Inuit People in these regions.
